

Hosted Money Transfer for Financial Institutions

A turnkey solution connecting your customers to the world

Let Western Union® give you peace of mind that you're meeting your customers' financial needs.

With our lightest-touch integration for consumer cross-border payments, your customers gain access to Western Union's unparalleled P2P payments experience. Using single sign-on from your website or mobile app, you can offer an industry-leading remittance service without the usual development challenges – and without managing a correspondent bank network.

- Up-front pricing and delivery speed for an outstanding customer experience.
- Leverage the iconic, 170 year old, Western Union brand, recognized by more than 90% of consumers worldwide.
- Keep customers in your ecosystem with transactions initiated on your website or mobile app and funded by their accounts.

Offer a world-class service with minimal investment.

- Western Union hosts the mobile-ready digital experience with minimal partner effort.
- The co-branded service is generally offered under the Western Union license.
- Integrate in as little as 5 weeks.
- 24/7 customer support in 38 languages and dialects.
- Western Union provides up-front consumer pricing and FX while you earn revenue share on each transaction.

A single global partner for all cross-border consumer payments.

- Your customers can send money to 200+ countries and territories for pick up in local currency in addition to real-time account payout capabilities in 100 countries for bank account, wallets and cards.
- Optimized customer experience designed for P2P transfers based on our extensive experience and best practices.
- Western Union handles all real-time sanctions and interdictions screening, if operating under our license.
- Our proprietary compliance engine manages KYC requirements after initial data share.
